

# Exhibition Highlights

- Exhibition Name : 2019 Taiwan International Plastics, Rubber & Composites Show
- Exhibition Date : 08/21-23/2019
- Exhibition Location : Kaohsiung Exhibition Center
- Exhibition Highlights :

Formosa Heavy Industries Corp (FHI) and Formosa Plastic Group (FPG) jointly participated in the 2019 Taiwan International Plastics, Rubber & Composites Show (PLASCOM TAIWAN). The exhibition was divided into three main sections, including "Corporate Image Zone", "Sustainable Energy Material Zone" and "Company Pavilions". FHI's booth was located in the "Circular Economy, Energy Saving and Carbon Reduction Zone" within the "Corporate Image Zone."

The theme of this exhibition that FHI wanted to bring to the public was the "High-Efficiency and Energy-Saving Heat Exchangers." The new products with the latest energy-saving technology such as "Helixchanger", "hiTRAN Thermal System" and "Shell and Plate Heat Exchanger" were exhibited. FHI can offer the best solution to improve the heat transfer efficiency and satisfy our customers' needs according to any different processing conditions. During the exhibition, the deputy minister of Economic Affairs and the deputy mayor of Kaohsiung City visited FHI's booth. FHI won the big success and made a splash from the iconic companies (e.g. CPC, CHIMEI and LCY) of the petrochemical industry in Taiwan and foreign customers.
